

Our visit of Samara

On arrival, we passed through a park named « arboretum » with many different species of trees.

Camille Welcomed us. She was our guide during all the day.

First we went inside the museum to learn many things about Paleolithic like :

- At the end of the Paleolithic the weather was very cold.
- Camille showed us how to use skins of animals and how to hunt reindeers with spears.

Then, in the morning, we did a work shop. We painted as humans did during Paleolithic. First we painted animals like horses , hippopotamus or mammoths. (Adam, Haroun, ouidad, Zaynab)

We used a piece of coal and then ochre and finally we put our hand prints. (alpha oumar, Hanna , Benjamin, Husna)

We also learn to make fire. We need wood, straw, flint and a fire stone and a mushroom. We rob flint and the fire stone together until it sparks. Then we throw it on the straw and blow until the fire start. (Lena, Hannah , Elisa, Fiona).

Our afternoon was about neolithic. During this period they are not nomads anymore. The lived in huge houses because many people lived inside. (Selam , Manar , Maïssa and Amal)

We also learned that humans started to make art like pottery.

In afternoon work shop we used our hands and clay to make pots. First we made a ball, then we put our thumbs in the clay and stretch it to make a pot. Finally , we used shells ans sticks to draw on the pots. (lika, Jade, Yasmine , samya)

We had a very good day in Samara. The best activity was to make pots . We had fun and we learned to make a bowl like in neolithic. (leon , Arthur , Irradat).
